Mondays (once a month) 12:30-1:20

Monday, December 1, 2014
FXB G12

New Technologies Being Employed in the Oil & Gas Industry With a Focus on the Unconventional Gas and Ultra-Deepwater Sectors

Chris Stolte

Executive MBA Student at MIT Sloan, BS in Petroleum Engineering from
Colorado School of Mines
Engineering Manager for Shell Appalachia,
Board of Advisors for Sourcewater

Learning Objectives: Participants will be able to: 1) explain new technologies being used in the oil and gas industry; 2) discuss the impacts (health, safety and environmental) of the new technologies; 3) discuss best practices for mitigating risks with these technologies; 4) discuss the role of environmental health and safety professionals in the oil and gas industry.

Sponsored by the Harvard-NIOSH Education and Research Center (T42 OH008416), the Environmental and Occupational Medicine and Epidemiology Program, the Harvard-NIEHS Center for Environmental Health (P30 ES000002), the Department of Environmental Health, and funded in part by the National Institute for Occupational Safety and Health.

Harvard School of Public Health is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Harvard School of Public Health designates this educational activity for a maximum of 1 AMA PRA Category I CreditsTM. Physicians should only claim credit commensurate with the extent of their participation in the activity. If physician participants wish to claim less than 1 AMA PRA Category I CreditsTM, please notify program staff prior to the conclusion of the activity.

All are welcome to attend.

Lunch available. Please bring your own drinks.
