Challenges in tuberculosis surveillance: documentation, treatment, and follow up

Presenter: David Rainey, MD, MPH, MEd
Resident Physician, Harvard Occupational and Environmental Medicine

Discussant: Deborah Barbeau, MD, PhD, MSPH
Medical Director, Occupational and Environmental Health Network

Learning Objectives: Participants will be able to: 1) describe the aims of Tuberculosis (TB) surveillance programs; 2) identify the challenges of current hospital-based TB surveillance; 3) discuss the testing methods currently available for the diagnosis of Latent tuberculosis infection (LTBI); 4) discuss the rationale for selecting one test over another; 5) discuss the treatment options for LTBI; and 6) to discuss the barriers to acceptance and adherence

Sponsored by the Harvard-NIOSH Education and Research Center (T42 OH008416), the Environmental and Occupational Medicine and Epidemiology Program, the HSPH-NIEHS Center for Environmental Health (P30 ES000002), the Department of Environmental Health, and funded in part by the National Institute for Occupational Safety and Health.

Harvard T.H. Chan School of Public Health is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Harvard T.H. Chan School of Public Health designates this educational activity for a maximum of 1 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity. If physician participants wish to claim less than 1 AMA PRA Category 1 Credits™, please notify program staff prior to the conclusion of the activity.
