Kresge, Room 502

A global perspective on preventable cardiovascular diseases from sulfur oxides reduction in coal-fired power plants

ChengKuaun (Calvin) Lin, MD
Doctor of Science Candidate,
Department of Environmental Health,
Harvard T.H. Chan School of Public Health

Learning Objectives: Participants will be able to: 1) describe coal capacity; 2) explain the term ‘national SOx reduction’; and 3) to describe what the elasticity for SOx reduction is.

Sponsored by the Harvard-NIOSH Education and Research Center (T42 OH008416), the Environmental and Occupational Medicine and Epidemiology Program, the Harvard-NIEHS Center for Environmental Health (P30 ES000002), the Department of Environmental Health, and funded in part by the National Institute for Occupational Safety and Health.

This program is sponsored by the Harvard School of Public Health. The Harvard T.H. Chan School of Public Health is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Harvard T.H. Chan School of Public Health takes responsibility for the content, quality, and scientific integrity of this CME activity.

The Harvard T.H. Chan School of Public Health designates this educational activity for a maximum of 1 AMA PRA category 1 credit™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

All are welcome to attend.

Light snacks and drinks available or bring your own.
