DNA Methylation of LRRC3B:
A Prognostic Biomarker for Survival of Early-Stage Non-Small Cell Lung Cancer Patients

Yichen Guo
Doctor of Science Candidate, Department of Environmental Health, Harvard T.H. Chan School of Public Health

Learning Objectives: Participants will be able to: 1) discuss the role of LRRC3B in some cancer types; 2) introduce the prognostic biomarkers of LRRC3B methylation in non-small cell lung cancer; and 3) discuss association between LRRC3B methylation on non-CpG islands and gene expression

Sponsored by the Harvard-NIOSH Education and Research Center (T42 OH008416), the Environmental and Occupational Medicine and Epidemiology Program, the Harvard-NIEHS Center for Environmental Health (P30 ES000002), the Department of Environmental Health, and funded in part by the National Institute for Occupational Safety and Health.

The Harvard T.H. Chan School of Public Health is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Harvard T.H. Chan School of Public Health takes responsibility for the content, quality, and scientific integrity of this CME activity.

The Harvard T.H. Chan School of Public Health designates this educational activity for a maximum of 0.75 AMA PRA category 1 credit™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

All are welcome to attend. ♦ Light lunch and drinks available or bring your own.
