Health and Climate Benefits of Offshore Wind Energy in the Gulf of Mexico

Rachel Croy
SM Candidate
Department of Environmental Health,
Harvard T.H. Chan School of Public Health
Learning Objectives: Participants will be able to 1) discuss North American power grid dynamics; 2) assess the wind energy profiles of three wind energy areas (WEA) in the Gulf of Mexico; 3) compare the co-benefits of these three WEA for Louisiana; and to 4) provide next steps for policymakers.

The State of the Union for US Transportation Emissions

Sarah Zelasky
SM Candidate
Department of Environmental Health,
Harvard T.H. Chan School of Public Health

Learning Objectives: Participants will be able to 1) define social cost estimation; 2) discuss when social cost estimation is useful; 3) describe how on-road transportation emissions have generally changed in the US between 2008 and 2014; 4) identify a few specific regions of the US or specific types of vehicles that contribute most to the US’s social costs from transportation emissions; and to 5) provide at least 2 reasons why a particular county might have higher social benefits associated with reducing 1 ton of CO2 and its co-pollutants.
