

# ACE Award Winner

## *(Acknowledging Commitment & Excellence)*

**Alan Berkeley, Senior Grants Manager  
Epidemiology**

Examples why Alan won the ACE Award:

- He is a natural teacher and a gifted leader.
- He is able to understand complex situations, accounting problems, and anticipates problems better than any grant manager one of the nominators stated she has ever worked with.
- Alan developed his own reporting system for reviewing grants with PIs – easy to follow and transparent.
- Continuously goes above and beyond the call of duty for his investigators, his teammates and in every aspect of his job.
- Manages two prolific researchers with ease despite how busy they are and how busy “he” is.
- He repeatedly found ways to make what was said to be impossible, from an administrative point of view, possible.
- He is dedicated to the mission of the School, devoted to his investigators and loyal to his team!
