

# ACE Award Winner

*(Acknowledging Commitment & Excellence)*

**Luis Hernandez, Faculty Coordinator  
Genetics and Complex Diseases**

Some examples why Luis is the recipient of the 2018 Summer ACE Award:

- The GCD department has 9 full-time faculty members. Due to departures and work re-assignments of several former assistants, Luis has taken on the responsibilities to cover 6 of the 9 faculty members over the past year.
- Luis has helped with any aspect of the laboratory operation from hiring, to financials when asked.
- He has helped out on major department initiatives, including support for training grant submission when a grants manager left.
- When Luis gets his hands on a problem, it gets done the right way. This is a phenomenal level of service that is worthy of recognition.
