VIDEO: Managing Stress

In this March 6 Forum event, panelists examined the effects of stress on health, the role social status plays in increasing or lessening these effects, and the ways in which positive well-being, mindfulness, exercise, and nutrition contribute to a healthier lifestyle.

Maternal health advocates push for new global goals

Attendees at a recent conference in Tanzania co-sponsored by HSPH's Maternal Health Task Force collaborated on a maternal health manifesto, published in The Lancet, that they hope will influence global leaders meeting this week to discuss the next development framework.

Survey gauges public support for government health interventions

The public is very supportive of government action aimed at changing lifestyle choices that can lead to obesity, diabetes, and other noncommunicable diseases, unless the actions are viewed as intrusive or coercive.

Centennial Moments
