To egg or not to egg
In this Q&A, Walter Willett discusses the science behind the government advisory committee’s recommendation to lift restrictions on cholesterol in the diet.

Malaria transmission linked to mosquitoes’ sexual biology
*Anopheles* mosquitoes’ reproductive traits evolved along with their capacity to transmit the parasite that causes malaria. These findings may provide a new target for malaria control.

The anti-aging benefits of calorie restriction—without the restriction
Targeting mechanisms in the central nervous system that sense energy generated by nutrients might yield the beneficial effects of low-calorie diets on healthy aging without the need to alter food intake.

Event Highlights

**23andMe: Genetic Testing for Consumers**
Twitter chat with John Quelch
February 27

Around the School

**Students: Apply for 2014-15 Loan Relief Award**
This program is open to enrolled masters students with 2014–15 academic year loans who will graduate in May 2015 and will be working with underserved communities in the U.S. or developing countries. Applications are due March 23.

**Apply for APHA Public Health Fellowship in Government**

Applications, including a CV and three letters of recommendation, are **due** to APHA on March 9. Forms, additional information and brief articles from the previous fellows are available on APHA’s website.

**The Policeman at the Elbow: The Neuroscience of Addiction, Self-Control, and Criminal Responsibility**

March 4, 12:00–1:00 PM, Harvard Law School

This panel discussion brings together a leading neuroscientist of addiction, a criminal law scholar, and a former judge to ask whether the law should reconsider aspects of responsibility and punishment in light of new science about self-control.
