Racism-induced stress linked with high black infant mortality
Around the School

Community comes together for Unity Reception
Dean Michelle Williams joined Meredith Rosenthal, Associate Dean for Diversity, and students, faculty, and staff for the School’s annual Unity Reception. The event was held at the conclusion of Black History Month, and offered the School community an opportunity to join together in the spirit of unity and to underscore the central importance of diversity, equity, and inclusion in public health.

School hosts life sciences, health care career fair
The Office for Alumni Affairs & Career Advancement and the Office for Career Services at the Faculty of Arts & Sciences collaborated on a new career fair that brought 22 companies in the life sciences and health care fields to campus to meet and network with more than 320 students. Students and postdocs at Harvard Chan are encouraged to sign-in to CareerConnect to view participating employer profiles and search for job and internship opportunities.

Seminar: Genomics of severe pediatric infections
Infectious diseases are among the leading causes of human mortality and the burden of infectious disorders is the greatest in the pediatric population. On March 28, Samira Asgari, postdoctoral research fellow and computational biologist at Brigham and Women’s Hospital, will speak about the role genetic variants play in susceptibility to life-threatening infections.
