Donald R. Hopkins named Commencement speaker

This year’s Commencement speaker will be Donald Hopkins, MPH ’70. Hopkins is an alumnus of the School who played a pivotal role in the elimination of smallpox and is now leading efforts that are close to eliminating Guinea worm disease worldwide.

Reducing the effects of adversity on early childhood development

The second annual State of Global Health Symposium convened experts to discuss what affects a child’s ability to lead a healthy and prosperous life. Students also presented research at a poster session.

Improving bicycle safety with better crash reporting

Researchers are calling for police to use electronic tablets that would include more options to gather bicycle crash data — information that when analyzed could guide the building of safer bicycle environments and encourage more cycling.
