Poor maternal health can have devastating consequences and is an urgent issue to tackle.

Midwives4All is an initiative of the Swedish MFA to spread knowledge about the benefits of midwives and evidence-based midwifery. We believe in the power of networks to achieve change.

Midwives4all highlights the importance of midwifery in broad cooperation with a range of different stakeholders. Together, we draw on our networks to innovate, share knowledge and make an impact.
Every woman has the right to survive pregnancy. Speak up for the women and children who can't.
