GMNHC 2015
October 19, 17:00 - 18:20
Doña Socorro meeting room, Hilton México City Reforma

Helping Babies Survive

Strengthening Newborn Health Capacity and Program Implementation

This session, aimed at participants with previous or potential exposure and use of the HBS curricula, will provide a forum to share information on the contents of the HBS training package, its introduction and use to strengthen newborn health knowledge, skills capacity and services in various countries in Africa, Asia and LAC. Country-level experiences will offer insight into the successes and challenges at various stages of planning, implementation and movement towards scale, within integrated MNH programs.

Session Objectives:
1. Share lessons learned from country processes and experiences in initiating and implementing HBS capacity building programs
2. Hold discussions on how the HBS package will be used within planned or existing maternal and newborn health care training programs within various country settings.
