Eligibility Requirements

Be a rising junior, senior or recent college graduate. Freshmen and sophomores can apply, but preference will be given to students who have completed coursework in quantitative subjects such as mathematics, statistics, or computer science and are in good academic standing with a strong GPA, and have completed coursework in biostatistics or computational biology.

Explore graduate school options in the annual Pipelines into Biostatistics symposium that reports on their research project at the end of the program.

Participate in collaborative research and programming, Health Data Science, Programming, Epidemiology, and Public Health or Health Data Science.

Prepare and deliver a final presentation in a collaborative research and programming, Health Data Science, Programming, Epidemiology, and Public Health or Health Data Science.

Attend seminars about current research topics, as well as workshops led by Harvard faculty and staff.

Participate in professional development workshops led by Harvard faculty and staff.

Enjoy social and cultural activities in the area of Boston, Massachusetts.

Travel to local laboratories and research centers to observe public health research in action.

Participate in a collaborative research and programming, Health Data Science, Programming, Epidemiology, and Public Health or Health Data Science.

Take non-credit coursework in Biostatistics, Programming, Health Data Science, Epidemiology, and Public Health or Health Data Science.
