ERRATA in Epidemiology, Volume 3, No. 4, July, 1992

Dr. James M. Robins has informed us of the following printing errors that appeared in his article "G-estimation of the effect of prophylaxis therapy for pneumocystis carinii pneumonia on the survival of AIDS patients":

p. 331, Equation A2.16: overbar was omitted from $\bar{\lambda}_{i,\text{int}}$ and $\bar{\lambda}_{m-1}$.

p. 332, Equation A2.18: overbar was omitted from $\bar{\lambda}_m$.

p. 333, "Example: Suppose" should precede Equation A2.21a, from which an overbar was omitted from $\bar{\lambda}_m$ on the left side of the equation.

p. 334, Equation A2.25: overbar was omitted from $\bar{\lambda}_m$ on the left side of the equation.

p. 336, column 2, line 13: delete "then;" beginning of line 14 should read "$\tilde{y}_{M,w,G}$."

Dr. Ron Dewar has informed us that Equation 4 which appeared on page 386 in his letter to the editor, "A simple confidence interval for the odds ratio in a two-by-two table with one zero cell," should read:

$$\text{OR}_i = \frac{\pi_i (d + c \pi_i)}{(1 - \pi_i) (b - c \pi_i)}$$

We regret any inconvenience these errors may have caused.
