Other Federal Funding Announcements

Department of Defense

United States Army Medical Research Materiel Command Congressionally Directed Medical Research Programs
CDMRP Research Funding for 2014

The Fiscal Year 2014 Department of Defense Appropriations Act provides research funding for the following peer reviewed programs managed by the Department of Defense office of Congressionally Directed Medical Research Programs (CDMRP):

- Amyotrophic Lateral Sclerosis Research Program - $7.5 million
- Autism Research Program - $6.0 million
• Bone Marrow Failure Research Program - $3.2 million
• Breast Cancer Research Program - $120.0 million
• Duchenne Muscular Dystrophy Research Program - $3.2 million
• Gulf War Illness Research Program - $20.0 million
• Lung Cancer Research Program - $10.5 million
• Multiple Sclerosis Research Program - $5.0 million
• Neurofibromatosis Research Program - $15.0 million
• Ovarian Cancer Research Program - $20.0 million
• Peer Reviewed Cancer Research Program - $25.0 million
• Peer Reviewed Medical Research Program - $200.0 million
• Peer Reviewed Orthopaedic Research Program - $30.0 million
• Prostate Cancer Research Program - $80.0 million
• Spinal Cord Injury Research Program - $30.0 million
• Tuberous Sclerosis Complex Research Program - $6.0 million

Comprehensive Program Announcements will be released during 2014. The Program Announcements will include detailed descriptions of funding mechanisms, evaluation criteria, submission requirements, and deadlines. Each Program Announcement may be downloaded from the Grants.gov website http://www.grants.gov, or the CDMRP website http://cdmrp.army.mil upon its release.

### Harvard Internal Funding Opportunities

**Harvard University Committee on Biological Sciences - Nomination Process now open:**

**Burroughs Wellcome Career Award for Medical Scientists**

**Burroughs Wellcome Investigators in the Pathogenesis of Infectious Disease**

**Pew Scholars Program**

**Deadline: April 1, 2014 by 5:00pm**

The University Committee on Biological Sciences administers the nomination process for Harvard faculty for a selection of funding opportunities from private foundations that require candidates to be nominated by Harvard University. Each year, several foundations invite Harvard junior faculty members and postdocs to apply for their fellowships and grants, which serve as critical funding at the early stages of a research career. Interested
investigators must first apply for the Harvard nomination through the UCBS, and the committee will select the final candidates who will then submit applications to the foundations.

Please visit http://www.fas.harvard.edu/~research/UCBS for application form, instructions, and further information.

**Office of Research Strategy and Development - Career Incubator Fund (CIF)**

**Request for Applications**

The Office of Research Strategy and Development is pleased to announce the next round of HSPH Career Incubator Funding (CIF).

A key goal of the HSPH Career Incubator Fund (CIF) is to encourage and support the scientific career development of Assistant and Associate Professors on the tenure ladder at HSPH. To advance this goal, HSPH will solicit proposals for (a) Pilot Projects, or (b) Data Collection/Analysis Projects that will provide faculty the opportunity to develop their research ideas, collect pilot data, or conduct secondary data analysis to be used as pilot data. A key goal of the CIF is to maximize faculty competitiveness for extramural funding. Although not required, we are particularly interested in proposals that are interdisciplinary in nature. A key goal is to allow faculty to develop innovative and novel ideas/methods.

**ELIGIBILITY**

Primary HSPH Assistant and Associate Professors who are within 3-8 years of initial appointment are eligible to apply. The goal is to support faculty whose start-up packages have ended. (See attached RFA for additional detail on eligibility criteria.)

**NUMBER AND SIZE OF AWARDS**

*Pilot Projects*: We expect to make up to four awards of $50,000 each for one-year Pilot Projects.

*Data Collection/Analysis Projects*: We expect to make two $10,000 awards to support a smaller Data Collection/Analysis Project

**SECOND YEAR FUNDING/COMPETITIVE RENEWAL APPLICATIONS NO LONGER ACCEPTED**

In the past, we have accepted renewal requests for a second year of CIF funding. Please note that we no longer accept applications from previous Career Incubator Fund awardees.

**DEADLINE**

April 14, 2014

SEE ATTACHED RFA FOR DETAILED APPLICATION INSTRUCTIONS AND CIF FACE PAGE.
Other Funding Opportunities

*New – Vilcek Foundation Prize in Biomedical Sciences, 2015
Call for Nominations

We are writing with information about the Vilcek Foundation 2015 call for nominations for Creative Promise in Biomedical Science. The 2015 nomination process closes at 5:00 pm EST on Tuesday, June 10, 2014.

There is no limit to how many applicants may come from Harvard University for this award, and applicants may self-nominate, but there are immigration and age requirements that need to be met http://www.vilcek.org/prizes/creative-promise/biomedical-science.html

Eligibility Requirements

To be eligible for the Vilcek Prize for Creative Promise in Biomedical Science, applicants must meet all of the criteria listed below

1. Applicant must have been born outside the United States.
2. Applicant must not be more than 38 years old as of December 31, 2014 (born on or after January 1, 1976).
3. Applicant must be a naturalized citizen or permanent resident (green card holder) of the United States.
4. Applicant must have earned a doctoral degree (MD, PhD, or equivalent).
5. Applicant must intend to pursue a professional career in the United States.
6. Applicant must hold a full-time position in an academic institution or other organization. Eligible positions include the following: Assistant or Associate Professor, Research Scientist, or equivalent. The applicant must be directly responsible for the design and execution of the work submitted for consideration. Graduate students and postdoctoral fellows working under the supervision of a mentor are not eligible.
7. Applicant must not be a past winner or finalist of the Vilcek Prize for Creative Promise.

We will be keeping an eye out for an announcement concerning 2015 nominations for the Vilcek Prize.

*New – 2014 BBVA Foundation Frontiers of Knowledge Awards

Nominations are open for the 2014 BBVA Foundation Frontiers of Knowledge Awards. The deadline to submit a nomination is June 30th, 2014.

Harvard Faculty have been successfully nominated for this award in the past. Most recently, Professor Elhanan Helpman, Galen L. Stone Professor of International Trade, FAS Economics, was selected in the area of Economics, Finance and Management.

Other nomination areas include:
Basic Sciences (Physics, Chemistry, Mathematics)
Biomedicine
Ecology and Conservation Biology (Edward O. Wilson, 2011)
Information and Communication Technologies
Contemporary Music
Climate Change
Development Cooperation
There is no limit on how many nominations may come from one university, but an individual cannot be nominated in more than one category.

Winners receive a diploma, commemorative art work, and 400,000 Euros ($555,610. Roughly).

More information can be found in the attached letter and at the link below.
http://www.fbbva.es/TLFU/tlfu/ing/microsites/premios/fronteras/nominacion/index.jsp

*New – The Taub Foundation Grant Program for Myelodysplastic Syndromes (MDS)

The Taub Foundation Grants Program for Myelodysplastic Syndromes (MDS) Research was created to support high-impact, innovative translational research to understand the underlying causes of MDS and to advance its treatment and prevention. The Program specifically focuses on MDS research, exclusive of AML and MPN.

ELIGIBILITY:

- All applicants must hold a faculty appointment at a non-profit, non-governmental academic, medical, or research institution in the United States.

- United States citizenship is not required; visa documentation is not required.

- Only one application may be submitted per applicant.

Initial Proposal Deadline:
Tuesday, March 25, 2014
12:00 Noon, U.S. EST

Funding Period:
November 1, 2014 – October 31, 2017

Award Amount:
$600,000 over three years ($200,000 per year)

Application Materials:
www.tmfgrants.org/Taub

*Limited Submission - American Diabetes Association – Pathway to Stop Diabetes Awards

The American Diabetes Association is now accepting nominations for its limited submission opportunity Pathway to Stop Diabetes Awards in an effort to inspire and support a new generation of diabetes researchers. Individuals
supported through this program will focus on innovative ideas and transformational approaches that lead to discoveries in diabetes prevention and treatment, and ultimately change the face of diabetes.

*The sponsor will only allow applicant institutions to nominate one nominee for either of two Pathway Awards (described in detail below):

- Diabetes Research Career Initiator (INI)
- Diabetes Research Accelerator (ACC)

If you are interested in applying for either award, please submit a brief notice of intent/interest to the HSPH Office of Research Strategy and Development (orsd@hsph.harvard.edu) as soon as possible but no later than March 28. Based on the number of notices received, we will determine whether an internal competition will need to be held to select the HSPH nominee for this award. If a competition is needed, we will require interested faculty to submit a 2-page synopsis of their proposed work by April 30, 2014.

**Diabetes Research Career Initiator (INI)**

Status: Open - Currently accepting applications

Application Deadline: July 1, 2014 for January 2015 funding

Award Description: This two-phased award is designed to support the transition from mentored training to independent research faculty

Eligibility: Eligible applicants must currently be in research training positions (post-doctoral fellow, research fellowship) and have no more than seven years of research training following terminal doctoral degree. Applicants cannot concurrently hold an NIH K99/R00 grant.

Candidates must be identified through institutional nomination; applications will be accepted only from individuals with the appropriate institution support

Support: Awards provide two distinct phases of research support. Phase 1 provides up to two years of support for mentored training at a maximum of $100,000 per year (including 10% indirect costs). Phase 2 provides up to five years of support for independent research at a maximum of $325,000 per year (including 30% indirect costs).

Combined support for Phase 1 and Phase 2 can total up to $1,625,000.

**Diabetes Research Accelerator (ACC)**

Status: Open - Currently accepting applications
Application Deadline: July 1, 2014 for January 2015 funding

Award Description: Awards are designed to support exceptional early-career researchers who have distinguished themselves as promising investigators and are in the beginning stages of establishing successful, independent diabetes research programs; and talented established investigators in fields other than diabetes who are interested in applying their skills and expertise to diabetes research.

Eligibility: Awards are available to individuals with established records of independent productivity in research, in two distinct categories:

- **Early Investigator:** Early-career diabetes investigators proposing innovative and ambitious diabetes-related research programs. Applicants must hold faculty positions and have demonstrated independent productivity in diabetes research. Applicants may currently hold independent NIH funding (K, U or R awards, including an initial R01/U01) but must not have applied for, or received, an R01/U01 renewal or a second R01/U01 award.

- **New to Diabetes Research:** Established investigators with exceptional productivity in fields other than diabetes research who would like to apply their expertise to innovative diabetes-related research topics. Applicants must hold faculty positions and have demonstrated independent productivity. Applicants cannot have previously received national grant support in diabetes research.

Candidates must be identified through institutional nomination; applications will be accepted only from individuals with the appropriate institution support.

Support: Awards provide five years of research support at a maximum of $325,000 per year (including 30% indirect costs), for a total of $1,625,000.

*Limited Submission - 2014 Lilly Innovation Fellowship Award*

Eli Lilly and Company is pleased to announce the 2014 Lilly Innovation Fellowship Award (LIFA); a competitive post-doctoral fellowship award and training partnership program. This prestigious Award program is designed to foster post-doctoral career development through the recognition of highly innovative post-doctoral research proposals by providing the recipient with up to 4 years of salary, benefits, limited travel support, and a unique training experience while participating in the program.

Recognizing that many post-doctoral training programs have not always prepared young scientists for the full cross section of job opportunities available to them (academia, industry, biotech/start-up, government, not-for-profit research), Lilly has designed this program to broaden a post-doctoral scientist’s training experience. Key to the success of this program will be the establishment of a true academic-industry training partnership where a post-doctoral fellow and their academic mentor are paired with a Lilly scientist who serves as an industry mentor.
The two mentors work together for the benefit of the post-doctoral trainee. As part of the LIFA program, the post-doctoral fellow will work at both the academic institution and at a Lilly research site (typically spending the second half of the post-doctoral training at Lilly), and would have access to Lilly scientists and technologies to enable the proposed post-doctoral research plan. An annual payment of $45,000 (adjusted for local currency) is made to the academic institution in support of the post-doctoral fellow for each year of participation irrespective of the site where the fellow works. Typical LIFA applications are expected to be pre-competitive in nature; thus publication is both encouraged and expected. Travel resources are provided so that the post-doctoral fellow can attend scientific meetings as well as participate in Lilly post-doctoral training programs.

*HSPH has been invited to select up to two (2) outstanding post-doctoral scientists to apply for this competitive Award. Please email your NOI to orsd@hsph.harvard.edu no later than COB on March 20, 2014.

**Program Requirements**

- To qualify for consideration, the LIFA applicant must be within 6 years of having received his/her PhD, MD or equivalent degree, and must have an academic post-doctoral mentor at your institution.

- Recent doctoral graduates may apply provided they complete their doctoral degree by August 1, 2014 and have obtained the commitment of an academic post-doctoral mentor in your School who will support them in their application process.

- All applicants must have the support of their institution. Your School may submit up to two (2) applications and they must be sent to Lilly by the office of the Dean. Applications received directly from individual applicants will not be accepted.

- If selected to receive a LIFA fellowship, the applicant must begin their post-doctoral appointment at your academic institution and available to accept the LIFA award and be on-boarded as a LIFA post-doctoral scientist no later than September 2014.

**Application Process**

1. The post-doctoral scientist completes the attached LIFA Application which briefly describes the innovative research the post-doc would pursue during their training. The application will be judged on its scientific and innovative merits, the track record of the academic mentor, fit between the research concept and Lilly’s resources, and two letters of recommendation submitted on behalf of the post-doc. LIFA “Finalists” selected through the initial merit review process will be notified in June 2014.

2. Selected LIFA “Finalists” will be invited to travel to a Lilly Research Laboratory site for a personal interview. Lilly will provide travel and accommodation for the interview.

3. Before the post-doc can receive the LIFA award, all parties will sign an academic-industry training partnership Agreement between the academic institution and Eli Lilly and Company. A copy of the Training Partnership agreement template will be mailed in the coming weeks, and will provide an overview of our standard Agreement structure and terms.

4. LIFA post-doctoral compensation is paid directly to the post-doctoral scientist by Lilly. All finalists must satisfy Lilly post-doctoral employment requirements prior to onboarding and beginning the LIFA program.
All four components must be successfully completed before a formal Award offer can be made. It is our goal to make formal Lilly Innovation Fellowship Award offers beginning July 2014, with salary start dates commencing in September 2014.

For over 135 years, research at Eli Lilly and Company has been at the forefront of innovation, and our company is synonymous with excellence in training and leadership development. We hope that you find this program exciting and that a post-doctoral scientist from your group will apply for the Lilly Innovation Fellowship Award. Please remember that this is a competitive Award program, so only a portion of the applicants will advance to candidacy. Although we are limiting the number of applications to select institutions, we anticipate that successful applicants will be within the top quartile of all applications received.

Additional details regarding the LIFA program, including the application process, forms, and related materials, are attached. Additional information can be found at www.lilly.com/LIFA. We have also provided answers to a list of Frequently Asked Questions (FAQs). If you have any additional questions, we encourage you to contact us at LIFA@Lilly.com.

**PCORI – Eugene Washington PCORI Engagement Awards Program**

The Engagement Awards were created to forge opportunities for patients and other stakeholder communities to become more involved in patient-centered research. Each award provides support for up to $250,000 with a project period of no more than two years. In 2014, PCORI will award up to $15 million to support projects in three categories:

- Knowledge Awards
- Training and Development Awards
- Dissemination Awards

Together, the awards will help establish a diverse community of passionate individuals with opportunities to participate in patient-centered research. More information about the [Eugene Washington PCORI Engagement Awards](www.lilly.com/LIFA).

Letters of Inquiry (LOI) are received on a rolling basis.

**PCORI Funding Opportunities**

PCORI has three broad funding cycles a year. Starting with May 2013, cycles are designated by the month and year that applications are due. More targeted and special funding opportunities may be available outside of these cycles.

There are some differences in the [latest round of PFAs](www.lilly.com/LIFA), issued Feb. 5, including the fact that for many of them, Letters of Intent (LOIs) are competitive. This means they’ll be reviewed for their responsiveness and fit with program goals and authors will be notified if they’re invited to submit a full application. Be sure to check the details of the PFA to which you’re applying.
Institute for Health Metrics and Evaluation - Roux Prize for turning evidence into health impact

The Roux Prize is a new US$100,000 award recently launched by the Institute for Health Metrics and Evaluation (IHME) to recognize individuals or groups who have used disease burden evidence to take action that makes people healthier. Nominees may come from anywhere in the world and could include, but are not limited to, staff in government agencies, researchers at academic institutions, volunteers in charitable organizations, or health providers working in the community. The only requirement is that they have used Global Burden of Disease (GBD) findings at some point since the publication of the first GBD study in 1993 to improve health at the local, national, or global level.

GBD is a systematic, scientific effort to quantify the comparative magnitude of health loss due to diseases, injuries, and risk factors. Data on disease burden have led to changes on a variety of health issues, ranging from global tobacco control to better diagnosis and treatment of children with diabetes in Ghana to laws in Vietnam encouraging helmet use among riders of motorcycles and bicycles to reduce road injury deaths.

Applications are due March 31, 2014, and the winner will be announced at an event in September 2014. More information can be found at rouxprize.org. A digital Roux prize flier is available online: ihmeuw.org/rouxprize-flier

Health Effects Institute - Health Effects Winter 2014 RFA Booklet

HEI has issued its Winter 2014 RFA booklet. It can be downloaded from www.healtheffects.org/funding.htm. The booklet includes:
- RFA 14-1, Enhancing Near-Road Exposure Assessment Through Characterization of Non-tailpipe and Tailpipe Emissions Near Urban Roads and in Tunnels, and
- RFA 14-2, Walter A. Rosenblith New Investigator Award
The booklet has detailed instructions for applicants, as well as new sets of application forms.

The Louis and Artur Lucian Award for Research in Circulatory Diseases

Nominations are now being accepted for the 2014 Louis and Artur Lucian Award for Research in Circulatory Diseases. Please see attached PDF.

There are no limits on how many applicants can come from an institution.
The nomination deadline is March 21, 2014.

This is a prestigious award, and as shown on the sheet of Past Recipients in the attached information, Harvard Medical School has done very well in past years.
The Life Sciences Research Foundation – Postdoctoral Fellowship Program

The LSRF solicits monies from industry, foundations and individuals to support postdoctoral fellowships in the life sciences. Active solicitation of funds continues, for which we need the assistance of all concerned individuals. We recognize that discoveries and the application of innovations in biology for the public's good will depend upon the training and support of the highest quality young scientists in the very best research environments. LSRF awards fellowships across the spectrum of the life sciences: biochemistry; cell, developmental, molecular, plant, structural, organismic population and evolutionary biology; endocrinology; immunology; microbiology; neurobiology; physiology; virology.

Robert Wood Johnson Foundation: Active Calls for Proposals

Health Impact Project
Deadline: Wed, 2 Apr 2014
6:00 p.m. ET

The Health Impact Project, a collaboration of RWJF and The Pew Charitable Trusts, promotes the use of Health Impact Assessments (HIAs) and related approaches to help policy-makers incorporate health considerations into new policies and programs.

Future of Nursing Scholars
Deadline: Tue, 15 Apr 2014
3:00 p.m. ET

The goal of this program is to develop the next generation of PhD-prepared nurse leaders and bring transformational change to nursing and health care.

Public Health Law Research: Making the Case for Laws That Improve Health
Closing Date: April 15, 2014

Changes in Health Care Financing and Organization
Open

HCFO supports research, policy analysis and evaluation projects that provide policy leaders timely information on health care policy, financing and organization issues.

Changes in Health Care Financing and Organization: Small Grants
Open

Small grants: HCFO supports research, policy analysis and evaluation projects that provide policy leaders timely information on health care policy, financing and organization issues.
Other Announcements

PCORI New Funding Cycle Dates and Names
PCORI is moving from three funding application cycles per year to four in an effort to increase the amount of research support awarded each year. As a result, cycles will have new deadline names. The December 2013 cycle is now called Winter 2014 and the application due date is changing from Monday, Dec. 16 to Tuesday, Jan. 21. The Spring 2014 cycle will open on Wednesday, Feb. 5, with required letters of intent due Friday, Mar. 7, and applications due Tuesday, May 6. Please visit the PCORI Funding Center to find more information.
