</tbody>
</table>

*Limited Submission Opportunity - If you are interested in applying for this opportunity, please submit a brief notice of intent to the HSPH Office of Research Strategy and Development (orsd@hsph.harvard.edu). Based on the number of notices received, we will determine whether an internal competition/internal coordination may be needed at the School or University-level to select nominees for this award.
Other Federal Funding Announcements

Department of Defense

United States Army Medical Research Materiel Command Congressionally Directed Medical Research Programs

CDMRP Research Funding for 2014

The Fiscal Year 2014 Department of Defense Appropriations Act provides research funding for the following peer reviewed programs managed by the Department of Defense office of Congressionally Directed Medical Research Programs (CDMRP):

- Amyotrophic Lateral Sclerosis Research Program - $7.5 million
- Autism Research Program - $6.0 million
- Bone Marrow Failure Research Program - $3.2 million
- Breast Cancer Research Program - $120.0 million
- Duchenne Muscular Dystrophy Research Program - $3.2 million
- Gulf War Illness Research Program - $20.0 million
- Lung Cancer Research Program - $10.5 million
- Multiple Sclerosis Research Program - $5.0 million
- Neurofibromatosis Research Program - $15.0 million
- Ovarian Cancer Research Program - $20.0 million
- Peer Reviewed Cancer Research Program - $25.0 million
- Peer Reviewed Medical Research Program - $200.0 million
- Peer Reviewed Orthopaedic Research Program - $30.0 million
- Prostate Cancer Research Program - $80.0 million
- Spinal Cord Injury Research Program - $30.0 million
- Tuberous Sclerosis Complex Research Program - $6.0 million

Comprehensive Program Announcements will be released during 2014. The Program Announcements will include detailed descriptions of funding mechanisms, evaluation criteria, submission requirements, and deadlines. Each Program Announcement may be downloaded from the Grants.gov website http://www.grants.gov, or the CDMRP website http://cdmrp.army.mil upon its release.

Amyotrophic Lateral Sclerosis Research Program
Autism Research Program
Bone Marrow Failure Research Program
Breast Cancer Research Program
Lung Cancer Research Program
Multiple Sclerosis Research Program
Ovarian Cancer Research Program
Peer Reviewed Cancer Research Program
*New - Peer Reviewed Medical Research Program
*New - Peer Reviewed Orthopaedic Research Program

Center for Disease Control and Prevention

*New - CDC: Health Impact Assessment for Improved Community Design Modification 1
Closing Date: May 12, 2014

*New - CDC: Community-based Programs to Test and Cure Hepatitis C Modification 4
Closing Date: May 20, 2014

*New - CDC: Economic Studies of Vaccines and Immunization Policies, Programs, and Practices for Adults
Closing Date: June 5, 2014

CDC: Centers for Disease Control and Prevention Agricultural, Forestry and Fishing Safety and Health Research Modification 3
Closing Date: June 9, 2014

CDC: Collaborations to Improve Identification and Care for Chronic Hepatitis B Virus (HBV) Infection among Persons in the United States who were Born in Countries with Intermediate-High (greater than or equal to two percent) HBV Prevalence
Closing Date: June 18, 2014

CDC: Workers Compensation Surveillance Modification 2
Closing Date: August 29, 2014

CDC: Agricultural, Forestry and Fishing Safety and Health Research Grant
Closing Date: October 31, 2014

CDC: Community-based Programs to Test and Cure Hepatitis C
Closing Date: May 20, 2014

CDC: Evaluation of Health Promotion and Prevention Programs for Blood Disorders Grant
Closing Date: May 21, 2014

CDC: Workers Compensation Surveillance
Closing Date: August 29, 2016

CDC: Fetal Alcohol Spectrum Disorders Practice and Implementation Centers
Closing Date: May 13, 2014

CDC: Improving Fetal Alcohol Spectrum Disorders Prevention and Practice through National Partnerships
Closing Date: May 13, 2014
**CDC: Addressing Emerging Infectious Diseases and the International Health Regulations Modification 2**
Closing Date: May 19, 2014

**CDC: Prevention NIOSH Small Research Program**
Closing Date: September 8, 2015

**CDC: Prevention NIOSH Exploratory/Developmental Grant Program**
Closing Date: September 8, 2015

**CDC: Occupational Safety and Health Research**
Closing Date: March 5, 2018

**CDC: NIOSH Exploratory/Developmental Grant Program**
Closing Date: September 8, 2015

**CDC: NIOSH Small Research Program**
Closing Date: September 8, 2015

---

**Department of Health and Human Services**

*New - HHS: HIV/AIDS Initiative for Minority Men (AIMM)*
Closing Date: June 9, 2014

*New - HHS: Disseminating and Implementing Evidence from Patient-Centered Outcomes Research in Clinical Practice Using Mobile Health Technology (R21)*
Closing Date: August 1, 2014

**HHS: PPHF-2014 Campus Suicide Prevention Grant (PPHF 2014)**
Closing Date: May 27, 2014

**HHS: FY14 National Health Education Program on Lupus for Healthcare Providers Modification 1**
Closing Date: June 9, 2014

**HHS: Cooperative Agreement for Workforce Development in Vietnam: HIV-Addiction Technology Transfer Center (Short Title: Vietnam H-ATTC)**
Closing Date: June 13, 2014

**DHHS: Administration for Community Living - National Resource Center on Nutrition and Aging Grant**
Closing Date: May 28, 2014

**DHHS: Early Care and Education Research Scholars: Child Care Research Scholars Grant**
Closing Date: June 16, 2014

**DHHS: Street Outreach Program - Administration for Children & Families - ACYF/FYSB**
Closing Date: May 12, 2014

**DHHS: Agency for Health Care Research and Quality Evaluation of AHRQ Initiative to Accelerate the Dissemination and Implementation of PCOR Findings into Primary Care (R01) Grant**
Closing Date: July 3, 2014
DHHS: Agency for Health Care Research and Quality Accelerating the Dissemination and Implementation of PCOR Findings into Primary Care Practice (R18) Grant
Closing Date: July 3, 2014

DHHS: Agency for Health Care Research and Quality Advances in Patient Safety through Simulation Research (R18) Grant
Closing Date: September 25, 2016

DHHS: Agency for Health Care Research and Quality Exploratory and Developmental Grant to Improve Health Care Quality through Health Information Technology (IT) (R21) Grant
Closing Date: November 16, 2016

DHHS: Pre-application: Opportunities for Collaborative Research at the NIH Clinical Center (X02) Modification 3
Closing Date: November 20, 2014

DHHS: Centers for AIDS Research and Developmental Centers for AIDS Research (P30) Grant
Closing Date: July 28, 2016

Environmental Protection Agency
None.

Food & Drug Administration

FDA: Advancing Medical Device Postmarket Surveillance Infrastructure and Epidemiologic Methodologies through Multi-stakeholder Partnership
Closing Date: April 30, 2017

Health Resources & Services Administration

*New - HRSA: Public Health Traineeships Program Modification 1
Closing Date: May 19, 2014

*New - HRSA: Alliance for Innovation on Maternal Health: Improving Maternal Health and Safety
Closing Date: June 16, 2014

HRSA: Public Health Traineeships Program
Closing Date: May 19, 2014

HRSA: MCH Adolescent and Young Adult Health Research Network
Closing Date: June 2, 2014
HRSA: Regional Public Health Training Center Program Modification 1
Closing Date: June 9, 2014

HRSA: National Coordinating Center for Public Health Training (NCCPHT)
Closing Date: June 9, 2014

HRSA: Regional Public Health Training Center Program
Closing Date: June 9, 2014

HRSA: National Coordinating Center for Public Health Training (NCCPHT)
Closing Date: June 9, 2014

HRSA: Regional Public Health Training Center Program
Closing Date: June 9, 2014

HRSA: MCH Health Care Transitions Research Network (HCT-RN) for Youth and Young Adults with Autism Spectrum Disorders (ASD)
Closing Date: May 12, 2014

HRSA: R40 MCH Autism Intervention Research Program Modification 1
Closing Date: May 12, 2014

HRSA: R40 MCH Autism Secondary Data Analysis Studies (SDAS) Program
Closing Date: May 12, 2014

HRSA: R40 MCH Autism Longitudinal Data Project
Closing Date: May 12, 2014

**National Institutes of Health**

*New - NIH: Global Infectious Disease Research Training Program (D43)
Closing Date: July 29, 2016

*New - NIH: Planning Grant for Global Infectious Disease Research Training Program (D71)
Closing Date: July 29, 2016

*New - NIH: Epidemiology and Prevention in Alcohol Research (R21)
Closing Date: September 7, 2017

*New - NIH: Epidemiology and Prevention in Alcohol Research (R03)
Closing Date: September 7, 2017

*New - NIH: Epidemiology and Prevention in Alcohol Research (R01)
Closing Date: September 7, 2017

NIH: Limited Competition: NIMHD Exploratory Centers of Excellence Pilot Research Projects (P20) Grant
Closing Date: June 19, 2014
NIH: Limited Competition: Transdisciplinary Collaborative Centers for Health Disparities Research Coordinating Center (U54) Grant
Closing Date: June 19, 2014

NIH: NIJ FY 14 Developing Knowledge About What Works to Make Schools Safe
Closing Date: July 10, 2014

NIH: Predoctoral Training in Biomedical Big Data Science (T32)
Closing Date: July 27, 2015

NIH: Clinical Trial Planning Grant for Interventions and Services to Improve Treatment and Prevention of HIV/AIDS (R34) Grant
Closing Date: January 7, 2017

NIH: mHealth Tools for Underserved Populations with Chronic Conditions to Promote Effective Patient-Provider Communication, Adherence to Treatment and Self-Management (R01) Grant
Closing Date: May 7, 2017

NIH: mHealth Tools for Underserved Populations with Chronic Conditions to Promote Effective Patient-Provider Communication, Adherence to Treatment and Self-Management (R21) Grant
Closing Date: May 7, 2017

NIH: Healthy Habits: Timing for Developing Sustainable Healthy Behaviors in Children and Adolescents (R21) Grant
Closing Date: May 7, 2017

NIH: Healthy Habits: Timing for Developing Sustainable Healthy Behaviors in Children and Adolescents (R01) Grant
Closing Date: May 7, 2017

NIH: Exploratory Clinical Trials of Mind and Body Interventions for NCCAM High Priority Research Topics (R34)
Closing Date: September 7, 2017

NIH: Mental Health Research Dissertation Grant to Increase Diversity
Closing Date: December 22, 2014

NIH: Innovative Programs to Enhance Research Training (IPERT) (R25)
Closing Date: January 21, 2016

NIH: Avenir Award Program for Research on Substance Abuse and HIV/AIDS (DP2)
Closing Date: November 14, 2016

NIH: Prevention and Treatment of Substance Using Populations with or at Risk for HCV (R21) Modification 1
Closing Date: May 7, 2017

NIH: Prevention and Treatment of Substance Using Populations with or at Risk for HCV (R01) Modification 1
Closing Date: May 7, 2017

NIH: Development of Software and Analysis Methods for Biomedical Big Data in Targeted Areas of High Need (U01) Modification 6
Closing Date: June 19, 2014
NIH: NIAID Division of Allergy, Immunology and Transplantation: Statistical and Clinical Coordinating Center (UM2)
Closing Date: July 18, 2014

NIH: Avenir Award Program for Genetics or Epigenetics of Substance Abuse (DP2)
Closing Date: August 18, 2016

NIH: Clinical Studies of Mental Illness Not Involving Treatment Development, Efficacy, or Effectiveness Trials (Collaborative R01)
Closing Date: May 7, 2017

NIH: Effects of Cannabis Use and Cannabinoids on the Developing Brain (R03)
Closing Date: May 7, 2017

NIH: Effects of Cannabis Use and Cannabinoids on the Developing Brain (R21)
Closing Date: May 7, 2017

NIH: Effects of Cannabis Use and Cannabinoids on the Developing Brain (R01)
Closing Date: May 7, 2017

NIH: Accelerating Medicines Partnership (AMP) in Rheumatoid Arthritis and Lupus: Network Leadership Center (UM2)
Closing Date: May 21, 2014

NIH: Accelerating Medicines Partnership (AMP) in Rheumatoid Arthritis and Lupus: Network Research Sites (UH2/UH3)
Closing Date: May 21, 2014

NIH: Collaborative Pediatric Critical Care Research Network (UG1)
Closing Date: June 2, 2014

NIH: Data Coordinating Center for the Collaborative Pediatric Critical Care Research Network (U01)
Closing Date: June 2, 2014

NIH: Atopic Dermatitis Research Network (ADRN) (U19)
Closing Date: July 8, 2014

NIH: Modeling Immunity for Biodefense (U19)
Closing Date: July 18, 2014

NIH: Core Infrastructure and Methodological Research for Cancer Epidemiology Cohorts (U01) Grant
Closing Date: March 10, 2017

NIH: Translational Research to Help Older Adults Maintain their Health and Independence in the Community (R21)
Closing Date: May 7, 2017

NIH: Translational Research to Help Older Adults Maintain their Health and Independence in the Community (R01)
Closing Date: May 7, 2014

**NIH: Chronic Inflammation and Age-related Disease (R01) Grant**
Closing Date: September 7, 2014

**NIH: Pre-application: Opportunities for Collaborative Research at the NIH Clinical Center (X02) Modification 1**
Closing Date: November 20, 2014

**NIH: Alzheimer's Disease Core Centers (P30)**
Closing Date: May 14, 2014

**NIH: Alzheimer's Disease Research Centers (P50)**
Closing Date: May 14, 2014

**NIH: Network and Infrastructure Support for Development of Interdisciplinary Aging Research (R24)**
Closing Date: May 28, 2014

**NIH: Advancing Exceptional Research on HIV/AIDS and Substance Abuse (R01) Grant**
Closing Date: July 31, 2014

**NIH: Development of Software and Analysis Methods for Biomedical Big Data in Targeted Areas of High Need (U01) Modification 4**
Closing Date: June 19, 2014

**NIH: Early Stage Development of Technologies in Biomedical Computing, Informatics, and Big Data Science (R01) Grant**
Closing Date: May 7, 2017

**NIH: Extended Development, Hardening and Dissemination of Technologies in Biomedical Computing, Informatics and Big Data Science (R01)**
Closing Date: May 7, 2017

**NIH: Development of Software and Analysis Methods for Biomedical Big Data in Targeted Areas of High Need (U01) Modification 3**
Closing Date: June 19, 2014

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research (Parent F31 - Diversity) Modification 1**
Closing Date: January 7, 2017

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (Parent F32) Grant**
Closing Date: January 7, 2017

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral MD/PhD or Other Dual-Doctoral Degree Fellowship (Parent F30) Grant**
Closing Date: January 7, 2017

**NIH: Ruth L. Kirschstein National Research Service Awards (NRSA) for Individual Senior Fellowship (Parent F33) Grant**
Closing Date: January 7, 2017
NIH: Community Partnerships to Advance Research (CPAR) (R21)  
Closing Date: May 7, 2017

NIH: Community Partnerships to Advance Research (CPAR) (R15)  
Closing Date: May 7, 2017

NIH: Community Partnerships to Advance Research (CPAR) (R15)  
Closing Date: May 7, 2017

NIH: Establishing Behavioral and Social Measures for Causal Pathway Research in Dental, Oral and Craniofacial Health (R01) Grant  
Closing Date: September 7, 2017

NIH: Establishing Behavioral and Social Measures for Causal Pathway Research in Dental, Oral and Craniofacial Health (R21) Grant  
Closing Date: September 16, 2017

NIH: Development of Software and Analysis Methods for Biomedical Big Data in Targeted Areas of High Need (U01) Modification 1  
Closing Date: June 19, 2014

Limited Submission - NIH: Initiative for Maximizing Student Development (IMSD) (R25) Grant  
Closing Date: January 25, 2016

NIH: Accelerating Improvements in the HIV Care Continuum (R21)  
Closing Date: January 7, 2017

NIH: Accelerating Improvements in the HIV Care Continuum (R01)  
Closing Date: January 7, 2017

NIH: Advancing Structural Level Interventions Through Enhanced Understanding of Social Determinants in HIV Prevention and Care (R01)  
Closing Date: January 7, 2017

NIH: Advancing Structural Level Interventions Through Enhanced Understanding of Social Determinants in HIV Prevention and Care (R21)  
Closing Date: January 7, 2017

NIH: Design and Development of Novel Technologies for Healthy Independent Living (R21) Grant  
Closing Date: January 7, 2017

NIH: Improving Delivery of HIV Prevention and Treatment through Implementation Science and Translational Research (R01)  
Closing Date: January 7, 2017

NIH: Strengthening Adherence to Antiretroviral-Based HIV Treatment and Prevention (R21)  
Closing Date: January 7, 2017

NIH: Strengthening Adherence to Antiretroviral-Based HIV Treatment and Prevention (R01)  
Closing Date: January 7, 2017

NIH: Technologies for Healthy Independent Living (R01) Grant
NIH: Targeted Basic Behavioral and Social Science and Intervention Development for HIV Prevention and Care (R01)  
Closing Date: January 7, 2017

NIH: Targeted Basic Behavioral and Social Science and Intervention Development for HIV Prevention and Care (R21)  
Closing Date: January 7, 2017

NIH: Prevention and Treatment of Substance Using Populations with or at Risk for HCV (R34)  
Closing Date: May 7, 2017

NIH: Prevention and Treatment of Substance Using Populations with or at Risk for HCV (R21)  
Closing Date: May 7, 2017

NIH: Prevention and Treatment of Substance Using Populations with or at Risk for HCV (R01)  
Closing Date: May 7, 2017

NIH: Synthetic Psychoactive Drugs and Strategic Approaches to Counteract Their Deleterious Effects (R21)  
Closing Date: May 7, 2017

NIH: Synthetic Psychoactive Drugs and Strategic Approaches to Counteract Their Deleterious Effects (R03)  
Closing Date: May 7, 2017

NIH: Synthetic Psychoactive Drugs and Strategic Approaches to Counteract Their Deleterious Effects (R01)  
Closing Date: May 7, 2017

NIH: NIDA Avant-Garde Award Program for HIV/AIDS and Drug Use Research (DP1) Grant  
Closing Date: July 29, 2016

NIH: NIDCD Research on Hearing Health Care (R21) Grant  
Closing Date: May 7, 2017

NIH: NIDCD Research on Hearing Health Care (R01) Grant  
Closing Date: May 7, 2017

NIH: Administrative Supplements to Existing NIH Grants and Cooperative Agreements (Parent Admin Supp) Grant  
Closing Date: January 30, 2017

NIH: Postbaccalaureate Research Education Program (PREP) (R25) Grant  
Closing Date: January 25, 2016

NIH: Mentored Career Development Award in Biomedical Big Data Science for Clinicians and Doctorally Prepared Scientists (K01) Grant  
Closing Date: April 1, 2015

NIH: Courses for Skills Development in Biomedical Big Data Science (R25)  
Closing Date: April 1, 2016

NIH: Open Educational Resources for Biomedical Big Data (R25)  
Closing date: April 1, 2016
NIH: Centers for AIDS Research and Developmental Centers for AIDS Research (P30) Modification 1
Closing Date: July 28, 2016

NIH: Substance Use and Abuse, Risky Decision Making and HIV/AIDS (R01) Grant
Closing Date: May 7, 2017

NIH: Substance Use and Abuse, Risky Decision Making and HIV/AIDS (R21) Grant
Closing Date: May 7, 2017

NIH: Substance Use and Abuse, Risky Decision Making and HIV/AIDS (R03) Grant
Closing Date: May 7, 2017

NIH: Cancer Center Support Grants (CCSGs) for NCI-designated Cancer Centers (P30) Grant
Closing Date: January 7, 2017

NIH: Developmental Origins of Health and Disease (DOHaD): Epigenetic Modification in Gametogenesis and Transgenerational Inheritance (R01) Grant
Closing Date: January 30, 2015

NIH: Replication of Key Clinical Trials Initiative (U01) Grant
Closing Date: January 14, 2016

NIH: NINDS Research Education Programs for Residents and Fellows in Neurology, Neurosurgery, Neuropathology, Neuroradiology and Emergency Medicine (R25) Grant
Closing Date: January 25, 2016

NIH: Nutrition and Alcohol-Related Health Outcomes (R03) Modification 1
Closing Date: January 7, 2017

NIH: Nutrition and Alcohol-Related Health Outcomes (R21) Modification 1
Closing Date: January 7, 2017

NIH: Nutrition and Alcohol-Related Health Outcomes (R01) Modification 1
Closing date: May 7, 2017

NIH: Clinical Research in the Prevention, Diagnosis, and Treatment of HIV-Related Heart, Lung, and Blood (HLB) Diseases in Adults and Children (R01) Grant
Closing Date: January 8, 2015

NIH: Establishing Outcome Measures for Clinical Studies of Oral and Craniofacial Diseases and Conditions (R21)
Closing Date: September 7, 2015

NIH: Establishing Outcome Measures for Clinical Studies of Oral and Craniofacial Diseases and Conditions (R01)
Closing Date: September 7, 2015

NIH: Advancing the Science of Geriatric Palliative Care (R21) Modification 1
Closing Date: January 7, 2017

NIH: Advancing the Science of Geriatric Palliative Care (R01) Modification 1
Closing Date: January 7, 2017
NIH: Opportunities for Collaborative Research at the NIH Clinical Center (U01) Modification 2  
Closing Date: March 20, 2015  

NIH: Research on Malignancies in the Context of HIV/AIDS (R21)  
Closing Date: September 7, 2016  

NIH: Research on Malignancies in the Context of HIV/AIDS (R01) Grant  
Closing Date: September 7, 2016  

NIH: Modeling Social Behavior (R01)  
Closing Date: January 7, 2017  

NIH - Evaluating Natural Experiments in Healthcare to Improve Diabetes Prevention and Treatment (R18) Grant  
Closing Date: November 1, 2016  

NIH: Pragmatic Research in Healthcare Settings to Improve Diabetes Prevention and Care (R18) Grant  
Closing Date: November 1, 2016  

NIH - Research on the Health Determinants and Consequences of Violence and its Prevention, Particularly Firearm Violence (R03) Grant  
Closing Date: January 7, 2017  

NIH - Research on the Health Determinants and Consequences of Violence and its Prevention, Particularly Firearm Violence (R01) Grant

### Other Funding Opportunities

**New - American Psychological Foundation - Lizette Peterson-Homer Injury Prevention Grant Award**

The Lizette Peterson Homer Memorial Injury Research Grant supports research into psychological and behavioral aspects of the prevention of injuries in children and adolescents as reflected in the activities and interests within pediatric psychology of the late Lizette Peterson-Homer and her commitment to improving the status of children in the face of the most significant threats to their health and development. This grant is open to students and faculty to support research related to the prevention of injuries in children and adolescents. Funding is available up to $5,000 and is sponsored jointly by the American Psychological Foundation and APA Div. 54.

Closing Date: October 1, 2014

For more info visit: [http://www.apa.org/apf/funding/peterson-homer.aspx](http://www.apa.org/apf/funding/peterson-homer.aspx)

**New - DF/HCC – UMass U54 REQUEST FOR GRANT APPLICATIONS - - DEADLINES EXTENDED**

The DF/HCC – UMass Boston U54 Comprehensive Partnership to Advance Cancer Health Equity seeks applications for both pilot and full projects. The U54 Partnership will be submitting a competing application for renewal in January, 2015. Pilot projects and full projects selected in response to this RFA will be included in this competing application and will be externally evaluated by NCI. Funding is contingent upon NCI’s successful review of this competing application.

You may download this RFA at: [http://www.umb.edu/u54/applying_for_funding](http://www.umb.edu/u54/applying_for_funding)

Award amount: Pilot projects up to $120,000 direct costs per year for two years. Full projects up to $250,000 direct costs per year for three years

SPONSOR: University of Massachusetts, Boston (UMass Boston) - Dana-Farber/Harvard Cancer Center (DF/HCC) Comprehensive Partnership to Advance Cancer Health Equity (CPACHE) (U54) Grant

FUNDING SOURCE: Federal

AWARD LEVELS:
A) Pilot Projects (up to $120,000 direct costs per year for two years)
B) Full Projects (up to $250,000 direct costs per year for three years)

DEADLINES & KEY DATES:

Deadline for Letter of Intent (Required): *June 2, 2014 by 11:59 PM EST
Deadline for Application Submission: July 25, 2014 by 11:59 PM EST
Anticipated Award Date: September 1, 2015

Key Dates:
**Oral presentations for internal feedback:
May 21, 2014
May 28, 2014
June 2, 2014
June 16, 2014

*By submitting a Letter of Intent (LOI) applicants will receive feedback prior to submitting a full application. Should you have questions or concerns about the LOI, please contact Lori-Anne Ramsay (please see below for contact information).

**Oral presentations are strongly encouraged and are intended to provide an opportunity to obtain feedback on proposal concepts. Oral presentations are 30mins long (Presentation: 20mins; Q&A: 10mins) and presentation templates will be provided. Applicants are limited to giving one oral presentation. Please note that you can give an oral presentation prior to submitting the LOI. To get into the queue for oral presentations please contact Lori-Anne Ramsay (please see below for contact information). Presentation slots will be allocated on a first-come basis.

EXPECTATIONS FOR PILOT PROJECT APPLICATIONS & FULL PROJECT APPLICATIONS:

The UMass Boston - DF/HCC Partnership will be submitting a competing application for renewal in January 2015. Pilot Projects and Full Projects selected in response to this RFA will be included in this competing application, and will be externally evaluated by NCI. Funding is contingent upon NCI’s successful review of this competing application.

Project selection in response to this RFA will prioritize Pilot Projects able to demonstrate evidence of being in a strong position to apply for a Full Project grant from the (CPACHE) (U54) mechanism and/or external funding sources (e.g. NIH, NSF, DOE) in two years.

Research proposed as a Full Project is expected to have promising preliminary data, and should demonstrate
evidence of being in a strong position to apply for an NIH R01 mechanism grant in three years.

OVERVIEW & GOALS:

The purpose of this joint grant between UMass Boston and DF/HCC is to foster and support intensive collaborations among investigators at UMass Boston (an institution that serves communities with cancer health disparities) and DF/HCC (an NCI-designated Comprehensive Cancer Center). The NCI Comprehensive Partnerships to Advance Cancer Health Equity (CPACHE) (U54) Grant aims to develop stronger national cancer programs to understand the reasons behind the significant cancer disparities and related impacts on underserved communities and socio-economically disadvantaged populations. More specifically, the goal of the UMass Boston-DF/HCC Partnership is to improve cancer-related research, training, and outreach opportunities for under-represented minority (URM) students, fellows, and early stage investigators; and to develop information and resources toward closing the cancer health disparities gap. For more information about the Partnership please visit www.umb.edu/u54.

Awards will support collaborative projects conducting innovative research in cancer spanning any area of basic, clinical, translational, prevention, control, behavioral and/or population research. Areas of interest: translational research, studies that involve tissue procurement, emerging technologies (emerging technologies include nanotechnology, proteomics, genomics and imaging) as well as research focusing on pediatric, adolescent and young adult cancers. In addition, one target area for the Partnership is cancer outreach. Applications focusing on cancer outreach must include hypothesis-driven research that may lead to increased use of and access to beneficial medical procedures, such as primary preventative measures. In addition, recruitment and retention of underserved and socio-economically disadvantaged populations into clinical trials such as prevention, early detection or treatment trials is encouraged.

Projects based at UMass Boston may focus on any area of cancer research, including the general areas of environmental carcinogenesis, cancer biology, molecular epidemiology, and/or behavioral issues related to cancer prevention, treatment and control.

Projects based at DF/HCC must specifically address areas of cancer disparity in underserved and/or socio-economically disadvantaged populations.

NOTE: NCI is particularly interested in developing educational, outreach and research projects leading to increased biospecimen collection from underserved populations, a critical endeavor to potentially elucidate the biological and genetic factors associated with cancer health disparities.

ELIGIBILITY & REQUIREMENTS:

All proposed research projects must illustrate collaboration between UMass Boston and DF/HCC scientists, and must focus on any aspect of cancer or cancer disparities. Additionally, all research projects must have high potential for leading to external funding through the NIH K-series, R03, R21, R01 mechanisms (for more information please see http://grants1.nih.gov/grants/oer.htm) or through foundation support; and should provide training opportunities for under-represented minority (URM) students and/or fellows. Interested faculty who do not have a partnership with a DF/HCC or UMass Boston scientist can receive assistance from the Partnership in finding a collaborator.
Prior to receiving funding from this mechanism, PIs involved must either be current members of the DF/HCC or should have submitted an application for DF/HCC membership. Faculty at DF/HCC institutions and at UMass Boston are eligible to become DF/HCC members. To apply for membership in the DF/HCC please go to www.dfhcc.harvard.edu/membership.

Investigators who have previously received or who are current recipients of funding from the UMass Boston-DF/HCC Partnership are eligible to apply in response to this RFA.

Inquiries regarding finding UMass Boston or DF/HCC collaborators should be submitted via email to Lori-Anne Ramsay (please see below for contact information).

Specific requirements for applications focused on cancer research vs. cancer disparities research: If more than 50% of the proposed research will be performed at UMass Boston, the project can focus on any area of cancer research or cancer disparities research. If more than 50% of the proposed research will be performed at DF/HCC, the project must focus on cancer disparities research.

Specific requirements for applications focused on basic science, population sciences, outcomes and social science: The proposed research project can focus on any area of cancer research or cancer disparities research. Areas of interest: translational research, studies that involve tissue procurement, emerging technologies (emerging technologies include nanotechnology, proteomics, genomics and imaging) as well as research focusing on pediatric, adolescent and young adult cancers. Project budget allocation across UMass Boston and DF/HCC is up to the collaborators' discretion. However, allocations must be clearly justified.

Specific requirements for applications focused on community outreach, cancer education, and dissemination of evidenced-based programs: The proposed research project must focus on cancer disparities. Applications focusing on cancer outreach must include hypothesis-driven research that may lead to increased use of and access to beneficial medical procedures, such as primary preventative measures, e.g., smoking cessation and cancer vaccines, or early detection procedures, such as mammography, PAP smear, colorectal cancer screening, etc. Research studies may include focus groups and needs assessments. These efforts must effectively reach individuals and physicians and should lead to increased use of medical procedures that may result in decreasing cancer health disparities. In addition, recruitment and retention of underserved and socio-economically disadvantaged populations into clinical trials such as prevention, early detection, or treatment trials is encouraged. Project budget allocation across UMass Boston and DF/HCC is up to the collaborators' discretion. However, allocations must be clearly justified.

LETTER OF INTENT (LOI) SUBMISSION INFORMATION:
Submission of a LOI is required. LOIs are limited to two pages in length, should be numbered (if needed) and in PDF format. The LOI should include the following information: 1) a description of the proposed research; 2) specific aims; 3) a brief paragraph on the scientific significance and how it relates to the goals of the NCI (CPACHE) (US4) and UMass Boston - DF/HCC Partnership; 4) 2-3 bullet points on how the outcomes of the proposed work will position the project well for funding as a US4 Full Project and/or NIH (e.g. R01/R15/R21-level funding) mechanism; and 5) DF/HCC and UMass Boston faculty who are collaborating along with their contact information. Feedback will be provided on all LOIs in order to help investigators develop the strongest application possible. The LOI is not binding and does not enter the review process.

LOIs should be submitted via email to Lori-Anne Ramsay (please see below for contact information).

Feedback on LOIs will be provided by June 30, 2014.

APPLICATION SUBMISSION INFORMATION:
The application must include all sections outlined below.

**Proposed Pilot Projects.** Pilot Projects proposed for funding cannot exceed $120,000 in direct costs per year for up to two years. The description of these projects should be provided in the following format:

A. **Title Page (limited to one page)** including: Title of the project, names of co-leaders from both partner institutions and a brief abstract stating the specific aims of the project.

B. **Research Strategy (limited to 6 pages inclusive of tables and figures. Appendix materials will not be accepted)** to include the following items:

  - Significance;
  - Innovation;
  - Preliminary Studies (encouraged but not required for pilot projects); and
  - Approach.

As part of the research strategy, describe how this Pilot Project relates to the overall priorities of the (CPACHE) (US4) grant and UMass Boston - DF/HCC Partnership target area(s). Include any preliminary data (if available). Projects without preliminary data are expected to provide scientific rationale based on appropriate supporting literature. Describe, as appropriate for the nature of the project, experimental methods/study design, or education plans and objectives. Identify which aspects of the Pilot Project will be conducted primarily at UMass Boston and which at DF/HCC. Research projects conducted primarily at UMass Boston may be in any area of cancer research, but research projects conducted primarily at DF/HCC must specifically address cancer disparities research.

The research strategy must also include information on how the proposed project will lead to peer-reviewed funding (i.e. full project funding from the UMass Boston - DF/HCC Partnership or independent NIH R01/R15/R21-level funding); plans for inclusion of under-represented minority (URM) students/trainees; strategies for developing and maintaining an active collaboration between the DF/HCC and UMass Boston investigators, and cross-institutional integration of research labs/programs; and plans for career development and mentorship for less experienced/early stage investigators/co-leaders. For the purpose of this RFA, an early stage investigator is a new Investigator within 10 years of completing his/her terminal research degree or is within 10 years of completing medical residency (or the equivalent) with no prior independent research funding from NIH or equivalent agencies e.g. R01, P01, etc. awards. Small awards (e.g. R03, R21) and training (K awards) do not count.

Other Sections of PHS 398 Research Plan (Sections 4-15) must also be completed (but are excluded from page limitations). In particular, Research Plan sections pertaining to human subjects and vertebrate animals must be strictly followed. See note below.

**Proposed Full Projects.** Full Projects proposed for funding cannot exceed $250,000 in direct costs per year for up to three years. The description of these projects should be provided in the following format:

A. **Title Page (limited to one page)** including: Title of the project, names of co-leaders from both partner institutions and a brief abstract stating the specific aims of the project.

B. **Research Strategy (limited to 12 pages inclusive of tables and figures. Appendix materials will not be accepted)** to include the following items:

  - Significance;
  - Innovation;
  - Preliminary Studies (encouraged but not required for full projects); and
  - Approach.

As part of the research strategy, describe how this Project relates to the overall priorities of the (CPACHE) (US4) grant and UMass Boston - DF/HCC Partnership target area(s). Include any preliminary data (if available). Projects without preliminary data are expected to provide scientific rationale based on appropriate supporting literature. Describe, as appropriate for the nature of the project, experimental methods/study design, or education plans and objectives. Identify which aspects of the Project will be conducted primarily at UMass Boston and which at DF/HCC. Research projects conducted primarily at UMass Boston may be in any area of cancer research, but research projects conducted primarily at DF/HCC must specifically address cancer disparities research.

The research strategy must also include information on how the proposed project will lead to peer-reviewed funding (i.e. full project funding from the UMass Boston - DF/HCC Partnership or independent NIH R01/R15/R21-level funding); plans for inclusion of under-represented minority (URM) students/trainees; strategies for developing and maintaining an active collaboration between the DF/HCC and UMass Boston investigators, and cross-institutional integration of research labs/programs; and plans for career development and mentorship for less experienced/early stage investigators/co-leaders. For the purpose of this RFA, an early stage investigator is a new Investigator within 10 years of completing his/her terminal research degree or is within 10 years of completing medical residency (or the equivalent) with no prior independent research funding from NIH or equivalent agencies e.g. R01, P01, etc. awards. Small awards (e.g. R03, R21) and training (K awards) do not count.

Other Sections of PHS 398 Research Plan (Sections 4-15) must also be completed (but are excluded from page limitations). In particular, Research Plan sections pertaining to human subjects and vertebrate animals must be strictly followed. See note below.
(accepted) to include the following items:

- Significance;
- Innovation;
- Preliminary Studies (required); and
- Approach.

A well-developed project and sufficient preliminary data are needed for Full Projects.

Describe how this Full Project relates to the overall priorities of the (CPACHE) (U54) grant and UMass Boston - DF/HCC Partnership target area(s). Include preliminary data (required). Describe, as appropriate for the nature of the project, experimental methods/study design, or education plans and objectives. Identify which aspects of the Full Project will be conducted primarily at UMass Boston and which at DF/HCC. Research projects conducted primarily at UMass Boston may be in any area of cancer research, but research projects conducted primarily at DF/HCC must specifically address cancer disparities research.

The research strategy must also include information on how the proposed project will lead to peer-reviewed funding (i.e. independent NIH R01-level funding); plans for inclusion of under-represented minority (URM) students/trainees; strategies for developing and maintaining an active collaboration between the DF/HCC and UMass Boston investigators, and cross-institutional integration of research labs/programs; and plans for career development and mentorship for less experienced/early stage investigators/co-leaders. For the purpose of this RFA, an early stage investigator is a new Investigator within 10 years of completing his/her terminal research degree or is within 10 years of completing medical residency (or the equivalent) with no prior independent research funding from NIH or equivalent agencies e.g. R01, P01, etc. awards. Small awards (e.g. R03, R21) and training (K awards) do not count.

Other Sections of PHS 398 Research Plan (Sections 4-15) must also be completed (but are excluded from page limitations). In particular, Research Plan sections pertaining to human subjects and vertebrate animals must be strictly followed. See note below.

**NOTE: For both Pilot Projects and Full Projects.** Include names of UMass Boston and DF/HCC PIs in the header and insert page numbers on all pages. The PHS 398 Instructions for the Content of Research Plan, in particular sections pertaining to human subjects and/or vertebrate animals (listed below), must be strictly followed and appropriate documentation (described in PHS 398 instructions) attached as required.

- Section 6. Protection of Human Subjects;
- Section 7. Inclusion of Women and Minorities;
- Section 8. Targeted/Planned Enrollment Table;
- Section 9. Protection of Children; and
- Section 10. Vertebrate Animals.

Research components involving clinical trials must include a data and safety-monitoring plan as described in the PHS instructions. Funds should be budgeted for these activities and should be justified. The proposed provisions should not duplicate review and monitoring systems already in place at the institution. For any cancer treatment protocol supported directly or indirectly by the Comprehensive Partnership U54, early stopping rules and procedures to detect and monitor adverse drug reactions (ADR) must be provided in the application, or in the case of protocols subsequent to funding of a U54, to the NCI Program Director.

Available Resources to Full Projects and Pilot Projects for Compiling the Research Proposal - - Utilization of these cores is **strongly recommended:**

UMass Boston - DF/HCC U54 Training Core:
The U54 Training Core aims to increase the number of trainees, particularly those from under-represented minority (URM) backgrounds, who are interested in cancer/cancer disparities research. This core is available to investigators to assist with strategizing and developing a URM training program plan that suits the nature of their proposal. Additionally, this core can help investigators identify UMass Boston students to work as part of their research teams. To learn more about this core, please visit [www.umb.edu/u54/cores/training_core](http://www.umb.edu/u54/cores/training_core). To request an appointment, please contact Erin Rainone at Erin.Rainone@umb.edu.

UMass Boston - DF/HCC U54 Survey & Statistical Methods Core (SSMC):
The U54 Survey and Statistical Methods Core (SSMC) offers consultation to investigators who would like guidance regarding the design of their proposal. The SSMC can assist with research design, measure development, and general feedback on project feasibility. Basic science research projects involving statistical analysis are strongly encouraged to contact the SSMC for advice on study design and data analysis. To request an appointment, please contact the SSMC by filling out a request for services at [http://www.umb.edu/ssmc/ssmc_contact/](http://www.umb.edu/ssmc/ssmc_contact/).

UMass Boston - DF/HCC U54 Outreach Core:
The Outreach Core aims to maximize the dissemination and implementation of evidence-based strategies to promote cancer prevention behaviors in faith-based and other community settings, provide training opportunities for students in outreach research, and offer resources and support to U54 new and ongoing research projects. The Outreach Core participates in the NCI National Outreach Network (NON) activities, including cross-cutting activities in biobanking. To learn more about this core, please visit [www.umb.edu/u54/cores/outreach_core](http://www.umb.edu/u54/cores/outreach_core). To request an appointment, please contact Elizabeth Gonzalez Suarez at Elizabeth_Gonzalez_Suarez@dfci.harvard.edu.

Biosketches: A current NIH Biosketch (this should include all other funding sources) is required for each participating PI. Biosketches should be submitted on the PHS 398 Biographical Sketch Format Page ([http://grants.nih.gov/grants/funding/phs398/phs398.html](http://grants.nih.gov/grants/funding/phs398/phs398.html)).

Budget: In this joint application, the DF/HCC and UMass Boston PIs will complete separate budgets, which when combined do NOT EXCEED the award amount, i.e., Full Projects: up to $250,000 direct costs per year for three years; and Pilot Projects: up to $120,000 direct costs per year for two years. Funds can be utilized for PI salary, equipment and technician or post-doctoral fellow salary (RFA1). Funds (salaries/stipends) must be budgeted to facilitate training undergraduate and graduate students. Award amounts for both Full Projects and Pilot Projects are in direct costs, so the proposed budget should be outlined in direct costs only. If selected for funding, the negotiated indirect costs will be awarded in addition to the proposed budget. Budgets should be submitted on the NIH 398 Detailed Budget for Initial Budget Period Format Page (fp4) ([http://grants.nih.gov/grants/funding/phs398/phs398.html](http://grants.nih.gov/grants/funding/phs398/phs398.html)), and budget justifications should be submitted on the PHS 398 Budget for Entire Proposed Project Period Format Page (fp5) ([http://grants.nih.gov/grants/funding/phs398/phs398.html](http://grants.nih.gov/grants/funding/phs398/phs398.html)). Outline major divisions of funds (personnel, equipment, supplies, other, etc.); and include adequate rationale in the budget justification.

IRB approval (if applicable): If IRB approval is necessary for the proposed research, approval will be required prior to receiving funding.

Targeted/Planned Enrollment Tables and Inclusion Enrollment Reports: If required, these must be submitted on PHS 398 forms ([http://grants.nih.gov/grants/funding/phs398/phs398.html](http://grants.nih.gov/grants/funding/phs398/phs398.html)).

**Format: This is a joint application. All materials, i.e., project narrative, budget pages specific to UMass Boston, budget pages specific to DF/HCC and biosketches, must be compiled and submitted as a single
Applications should be submitted via email to Lori-Anne Ramsay (please see below for contact information).

All application submissions will be acknowledged via email. Should you not receive confirmation of your application submission please contact Lori-Anne Ramsay (please see below for contact information).

Additionally, all inquiries related to this RFA should be directed via email to Lori-Anne Ramsay.

Application decisions will be made by August 31, 2014.

PROPOSAL REVIEW CRITERIA:

Applications will be reviewed by designated review committees. Reviewers will assign a score on the overall application based on the following review criteria:

- **Significance.** The project addresses important problems or critical barriers to progress in cancer research or cancer disparities research. The aims of the project advance scientific knowledge, technical capability, and have near-term impact.

- **Innovation.** The project utilizes novel theoretical concepts, approaches or methodologies, instrumentation, or interventions.

- **Investigator(s).** The PIs, collaborators, and other key personnel have the necessary experience and expertise to accomplish the goals of the proposed research project. The investigators have complementary and integrated expertise.

- **Approach.** The overall strategy, methodology, and analyses are well-reasoned and appropriate to accomplish the specific aims of the project, and cross-institutional integration of research labs/programs is clearly defined.

- **Career Development.** There is a well thought-out and reasonable plan for career development of early stage investigator(s). Mentor(s) have been identified and the appropriate mechanisms are in place to achieve career development goals outlined.

- **Student Training.** There will be significant opportunity for the training of URM students and fellows.

- **Potential for External Funding.** There is a high likelihood that the proposed research project will lead to NIH K-series, R03, R21, R01 etc. mechanisms, or other types of foundation funding.

Limited Submission – Smith Family Awards Program for Excellence in Biomedical Research

Overview
In 1991, the Smith Family Foundation created a grants program to support promising junior faculty who were beginning to establish their own independent laboratories and research programs. Now in its 23rd year, this Program has funded 137 scientists for a total of $25.1 million.

Applications may focus on all fields of basic biomedical science. Investigators in the physical sciences (physics, chemistry and engineering) with biomedical research projects are also encouraged to apply.

Internal NOI due – Monday, May 19
Online Application Deadline - Wednesday, July 16, 2014
12:00 Noon, U.S. Eastern Time

Funding Period
Dec. 1, 2014 - Nov. 30, 2017

Award Amount
Five $300,000 awards at $100,000 per year, inclusive of 5% institutional overhead

Application Materials
www.tmfgrants.org/Smith

Questions
GLockwood@hria.org or 617-279-2240, x702

Eligibility
Full-time faculty whose first independent appointment began between 7/1/12 and 12/1/14
Two applications from any School or College within a MA academic institution
Two applications from any hospital or free standing nonprofit biomedical research facility in MA
Two applications each from Brown University and Yale University
Applications from women scientists are encouraged

*Those interested in applying should submit the following in one PDF by 5:00 pm EST on Monday, May 19th to the HSPH Office of Research Strategy and Development (orsd@hsph.harvard.edu):

- A completed HSPH Application Cover Sheet (attached)
- Nominating letter addressed to the Senior Associate Dean for Research, Francesca Dominici, Office of Research Strategy and Development, signed by your Department or Division Head. (LIMIT 2 pages)
- Post docs must include an additional letter from a research mentor (LIMIT 2 pages). *Please note that not all limited submission opportunities are open to postdoctoral fellows; see sponsor guidelines for applicable eligibility requirements.
• Up-to-date Curriculum Vitae — (NIH format LIMIT 4 pages) including:
  ▪ -publications
  ▪ -listing of current, past and pending sources of funding

• Summary of the nominee’s proposed research. (LIMIT 2 pages and a third page may be used for references)

• Budget statement (LIMIT 1 page)
  Investigators typically use the standard NIH PHS 398 budget format ([http://grants.nih.gov/grants/funding/phs398/phs398.html](http://grants.nih.gov/grants/funding/phs398/phs398.html))

2014 Raymond and Beverly Sackler International Prize in Biophysics

Unlike past opportunities offered by the Sackler Foundation, this prize has no age limitation attached.
**The deadline to submit nominations is June 15, 2014.**

Information can be found here [http://english.tau.ac.il/sackler_prize_in_biophysics](http://english.tau.ac.il/sackler_prize_in_biophysics) and in the attached papers.

UPenn - Basser Global Prize Application 2014

Nominations are now being accepted for the Basser Global Prize in BRCA1/2 related research that has led to improvements in clinical care.

The prize is offered by [The University of Pennsylvania’s Basser Research Center for BRCA](http://www.penncancer.org/basser/investigators-and-researchers/basser-global-prize/)

The prize includes $200,000 in unrestricted support of the awardee’s innovative BRCA1/2 related research efforts. There are no geographic or institutional restrictions placed on potential nominees, but applicants may not self-nominate.

The application deadline is May 15, 2014.

The nomination package, including details and instructions on what to include, can be found here: [http://www.penncancer.org/basser/investigators-and-researchers/basser-global-prize/](http://www.penncancer.org/basser/investigators-and-researchers/basser-global-prize/)

**Limited Submission: National Institutes of Health**

**Occupational Safety and Health Training Project Grants (T03) - PAR 10-288**

**Internal Due Date:** June 9, 2014

**Internal Competition Instructions:** Harvard, as one institution, may submit one application for this opportunity. The OVPR office will facilitate an internal submission process to determine an application to go forward.

Interested applicants are asked to send the following to Autumn_Bennett@harvard.edu
• A proposal of not more than three pages summarizing the background (item 2), the proposed training (component of item 3), and the recruitment and retention plan to enhance diversity (the NIH will not review applications without a plan for diversity recruitment efforts)
• CV of PI(s), any format acceptable
• Institutional letter of support (likely at the Dean level) for the project should the application go forward for submission

Sponsor Due Date: August 24, 2014

Other Details:
Type of Award: New, renewal
Estimated # of Awards:
Anticipated Funding Amount: Undergraduate programs may request up to $50,000/year, Predoctoral programs up to $125,000/year, and Occupational Medicine residency programs up to $200,000/year
Award Project Period: New Applicants may request a project period of up to three (3) years. Renewal applicants may request a project period of up to five (5) years.
Anticipated Date of Award: July 1, 2015
Sponsor LOI: not required
Sponsor Preliminary Proposal Submission date: not required

Overview:

Training Programs

This program will support high quality Bachelors, Masters, Doctoral, and Post-Doctoral (OMR only) training programs. This program will not support academic certificate programs. Grantees are expected to track all program graduates, including placement and progress in their careers.

Certain training areas are considered “core disciplines”. The core disciplines are: OMR, OHN, IH, and OS. In addition to these core disciplines, in order to take full advantage of the unique strengths and capabilities of institutions, consideration will be given to the development of new and innovative academic component programs in allied disciplines that are relevant to the occupational safety and health field, e.g., ergonomics, industrial toxicology, occupational injury prevention, occupational epidemiology, occupational health psychology, occupational health services, and agricultural safety and health. There must be a minimum of five (5) full time trainees in each program, with the exception of OMR, where there must be at least four (4) full time trainees.

Occupational Health Physics is an allied occupational safety and health academic program that continues as a new area of interest to NIOSH. Occupational health physicists establish radiation protection measures and radiation exposure characteristics for individual and classes of workers in various occupational environments where radioactive materials are used. Occupational Health Physics academic and research training programs are needed that provide masters and doctoral level training in health physics, radiation protection measures, exposure pathway analysis, and radiation dose estimation and reconstruction. These are critical areas of instruction and essential components of occupational health radiation protection programs.

Accreditation by the Accreditation Council for Graduate Medical Education (ACGME), http://www.acgme.org, is required for OMR programs. In addition, a TPG is encouraged to have accreditation of the Bachelors and Masters level training programs by applicable recognized specialized accrediting organizations, including ABET, http://www.abet.org.

TPGs must document that the core or allied training programs proposed will fill a critical gap in the selected occupational safety and health disciplines that meet specific regional workforce needs. A regional OSH workforce assessment is an important tool in establishing the need for OSH training programs. Evidence of meeting such
needs includes documented placement of graduates in responsible occupational safety and health practitioner and/or research positions in the private and/or public sectors. In addition, TPGs must have an advisory committee of three or more individuals who can provide advice on the program focus and curriculum. The committee may include representatives of labor, industry, government agencies, academic institutions and professional associations.

Each core area program curriculum should include courses that fully prepare trainees to move into and/or advance in the OSH work environment. Appropriate clinical rotations and field experiences with occupational safety and health agencies or other appropriate groups and with labor-management health and safety groups are encouraged.

Core programs can offer masters and doctoral degrees. Pre-doctoral training must lead to the Masters degree and/or the Ph.D. degree or a comparable research doctoral degree. Pre-doctoral training should emphasize fundamental training in areas of occupational safety and health sciences.

A TPG is encouraged to provide Doctoral and Masters trainees instruction in the following areas:

1. Responsible conduct of research (required for all Masters [research] and Doctoral trainees)
2. How to write research grant proposals (optional)
3. How to manage research laboratories (optional)

In addition, a TPG must have an Under-represented Trainee Recruitment and Retention Plan.

TPGs are encouraged to recruit and train students to help address the under-representation among the occupational safety and health professional workforce. A detailed plan to address the under-representation of minorities among occupational safety and health professionals and for the recruitment of under-represented minorities to the core programs must be a part of the application. The initial review group will review this plan as part of the overall rating of the application. Specific efforts to conduct outreach activities to develop collaborative training programs with academic institutions serving minority and other under-represented populations, such as Tribal Colleges and Universities, Historically Black Colleges and Universities, and Hispanic-Serving Institutions are encouraged.

**Edward Mallinckrodt, Jr Foundation - Mallinckrodt Grants**

This year the Edward Mallinckrodt, Jr Foundation has expanded their institutional limits concerning the Mallinckrodt Grants opportunity and will allow Harvard to submit two (2) nominations per school. These grants are focused on biomedical research.

If you are interested in being nominated for this opportunity, please let the Office of Research Strategy and Development know by Friday, May 30, 2014 (orsd@hsph.harvard.edu).

Details concerning the 2014 submission can be found here: [http://emallinckrodtfoundation.org/Submission.html](http://emallinckrodtfoundation.org/Submission.html). The Mallinckrodt Calendar does yet display the due date for 2014 applications, but we have been informed it will fall in August.
Vilcek Foundation Prize in Biomedical Sciences, 2015
Call for Nominations

We are writing with information about the Vilcek Foundation 2015 call for nominations for Creative Promise in Biomedical Science. The foundation is seeking applications from young, foreign-born researchers age 38 and under from now through June 10, 2014. Three winners will each be awarded a $50,000 unrestricted cash prize. The 2015 nomination process closes at 5:00 pm EST on Tuesday, June 10, 2014.

There is no limit to how many applicants may come from Harvard University for this award, and applicants may self-nominate, but there are immigration and age requirements that need to be met http://www.vilcek.org/prizes/creative-promise/biomedical-science.html

Eligibility Requirements

To be eligible for the Vilcek Prize for Creative Promise in Biomedical Science, applicants must meet all of the criteria listed below

1. Applicant must have been born outside the United States.
2. Applicant must not be more than 38 years old as of December 31, 2014 (born on or after January 1, 1976).
3. Applicant must be a naturalized citizen or permanent resident (green card holder) of the United States.
4. Applicant must have earned a doctoral degree (MD, PhD, or equivalent).
5. Applicant must intend to pursue a professional career in the United States.
6. Applicant must hold a full-time position in an academic institution or other organization. Eligible positions include the following: Assistant or Associate Professor, Research Scientist, or equivalent. The applicant must be directly responsible for the design and execution of the work submitted for consideration. Graduate students and postdoctoral fellows working under the supervision of a mentor are not eligible.
7. Applicant must not be a past winner or finalist of the Vilcek Prize for Creative Promise.

We will be keeping an eye out for an announcement concerning 2015 nominations for the Vilcek Prize.

2014 BBVA Foundation Frontiers of Knowledge Awards

Nominations are open for the 2014 BBVA Foundation Frontiers of Knowledge Awards. The deadline to submit a nomination is June 30th, 2014.

Harvard Faculty have been successfully nominated for this award in the past. Most recently, Professor Elhanan Helpman, Galen L. Stone Professor of International Trade, FAS Economics, was selected in the area of Economics, Finance and Management.

Other nomination areas include:
Basic Sciences (Physics, Chemistry, Mathematics)
Biomedicine
Ecology and Conservation Biology (Edward O. Wilson, 2011)
Information and Communication Technologies
Contemporary Music
Climate Change
Development Cooperation
There is no limit on how many nominations may come from one university, but an individual cannot be nominated in more than one category.

Winners receive a diploma, commemorative art work, and 400,000 Euros (approx. $555,610.00)

More information can be found in the attached letter and at the link below.

PCORI – Eugene Washington PCORI Engagement Awards Program

The Engagement Awards were created to forge opportunities for patients and other stakeholder communities to become more involved in patient-centered research. Each award provides support for up to $250,000 with a project period of no more than two years. In 2014, PCORI will award up to $15 million to support projects in three categories:

- Knowledge Awards
- Training and Development Awards
- Dissemination Awards

Together, the awards will help establish a diverse community of passionate individuals with opportunities to participate in patient-centered research. More information about the Eugene Washington PCORI Engagement Awards.

Letters of Inquiry (LOI) are received on a rolling basis.

PCORI Funding Opportunities
PCORI has three broad funding cycles a year. Starting with May 2013, cycles are designated by the month and year that applications are due. More targeted and special funding opportunities may be available outside of these cycles.

There are some differences in the latest round of PFAs, issued Feb. 5, including the fact that for many of them, Letters of Intent (LOIs) are competitive. This means they'll be reviewed for their responsiveness and fit with program goals and authors will be notified if they're invited to submit a full application. Be sure to check the details of the PFA to which you're applying.

Robert Wood Johnson Foundation: Active Calls for Proposals

*New* - Public Health Services and Systems Research
Deadline: Wed, 23 Jul 2014 3:00 p.m. ET

PHSSR is a multidisciplinary field that seeks to identify how best to organize, finance and deliver public health strategies that can improve health on a population-wide basis.
Changes in Health Care Financing and Organization
Open

HCFO supports research, policy analysis and evaluation projects that provide policy leaders timely information on health care policy, financing and organization issues.
