## **Robert Wood Johnson Foundation: Active Calls for Proposals**

### **[\\*NEW: Robert Wood Johnson Foundation: Policies for Action](#)**

Letter of Intent Deadline: March 15, 2016

Full Proposal Deadline: June 17, 2016

Policies for Action: Policy and Law Research to Build a Culture of Health (P4A) was created to help build an evidence base for policies that can lead to a Culture of Health. The goal is to develop research that generates actionable evidence—the data and information that can guide legislators and other policymakers, public agencies, educators, advocates, community groups, and individuals. The research may examine established laws, regulations, and policies as well as potential new policies and approaches. The research funded under this call for proposals (CFP) should inform the significant gaps in our knowledge regarding what policies can serve as levers to improve population health and well-being, and achieve greater levels of health equity.

### **[Robert Wood Johnson Foundation: Policy-Relevant Insurance Studies \(PRIS\)](#)**

Application Deadline: February 19, 2016

With the passage and implementation of the Affordable Care Act, the law helped millions of previously uninsured Americans gain health insurance; expanded coverage options; established online marketplaces to promote competition among insurers to the benefit of consumers; and stimulated payment reforms to make the cost of insurance and care more affordable. Despite the progress the law has made, millions remain uninsured. RWJF is looking to fund quantitative research examining the effects of existing policies, or predicting the effects of improvements to existing policies or new policies, in an effort to learn what policies might be the most successful in expanding health insurance to all Americans.

### **[Evidence for Action: Investigator-Initiated Research to Build a Culture of Health](#)**

Deadline: Open (Applications are accepted on a rolling basis)

The program aims to provide individuals, organizations, communities, policymakers, and researchers with the empirical evidence needed to address the key determinants of health encompassed in the Culture of Health Action Framework. Additionally, ***Evidence for Action* will also support efforts to assess outcomes and set priorities for action. It will do this by encouraging and supporting creative, rigorous research on the impact of innovative programs, policies and partnerships on health and wellbeing, and on novel approaches to measuring health determinants and outcomes.** Approximately \$2.2 million will be awarded annually. RWJF expect to fund between five and 12 grants each year for periods of up to 30 months.

## **PCORI – Eugene Washington PCORI Engagement Awards Program**

The Engagement Awards were created to forge opportunities for patients and other stakeholder communities to become more involved in patient-centered research. Each award provides support for up to \$250,000 with a project period of no more than two years. In 2014, PCORI will award up to \$15 million to support projects in three categories:

- Knowledge Awards
- Training and Development Awards
- Dissemination Awards

Together, the awards will help establish a diverse community of passionate individuals with opportunities to participate in patient-centered research. More information about the [Eugene Washington PCORI Engagement Awards](#). Letters of Inquiry (LOI) are received on a rolling basis.

[COS Pivot](#)- Harvard University subscribes to COS Pivot, a comprehensive web-based resource of funding information which publishes more than 15,000 federal, non-federal, and industry-sponsored funding opportunities and is updated on a daily basis. New users must create an account using their Harvard e-mail before performing searches. One of Pivot's most useful features is its ability to save and then automatically run searches on a weekly basis to notify users when opportunities matching their search parameters are announced.
