

PRE-/POST-DOCTORAL FELLOWSHIPS IN ENVIRONMENTAL EPIDEMIOLOGY

Program

The Departments of Epidemiology and Environmental Health at the Harvard T.H. Chan School of Public Health have a long tradition of excellence in environmental health research. The Environmental Epidemiology Training Program is funded by the National Institute for Environmental Health, which provides support for pre- and post-doctoral training fellowships. Successful applicants will join a stimulating, interdisciplinary research environment that combines rigorous training in epidemiology and exposure analysis. In addition to the traditional training program, students who wish to incorporate laboratory training can choose a track in Environmental Molecular Epidemiology. Dr. Francine Laden directs the program.

Eligibility

Trainee categories include:

- Pre-doctoral and post-doctoral (MD, ScD, PhD, DVM) candidates who are accepted to the doctoral degree program in Epidemiology or Environmental Health at the Harvard T.H. Chan School of Public Health.
- Post-doctoral fellows with a prior doctoral degree in Epidemiology, Biology, Industrial Hygiene, or Medicine who will train in Environmental Epidemiology or Environmental Molecular Epidemiology.

U.S. citizenship or permanent residency is required.

Application

Applicants can apply online:
